

ELECTRICAL

West Coast Construction & Demolition Pty Ltd (WCCD) are an established building services company with an enviable client list and a proven track record spanning more than a decade.

WCCD are preferred contractors to several state and federal government departments as well as a range of national commercial clients. These include:

- Department of Defence
- Department of Education
- Department of Justice
- CCA Amatil
- oOh! Media
- Bethanie Aged Care

We attribute WCCD's success to its versatile team of in-house tradesmen and specialised sub-contractors, many of whom have a long association with the business.

Although primarily a building company, most projects that WCCD undertake include an element of electrical work. Two years ago, we increased our in-house capacity to include a licenced Electrical Contractor and electrical tradesmen.

Now offering stand-alone electrical services

WCCD now offer the following electrical services to both new and existing commercial and government clients as part of building works or as stand-alone services:

- 24/7 emergency electrical call-outs.
- Full electrical fit-out projects.
- Major residential and commercial planned maintenance.
- Communication projects.
- Residential and commercial solar installations and maintenance.

All electrical work is carried out under the supervision of a licenced electrical contractor and covered by the appropriate insurance.

If you're looking for a partner for your next electrical project, we encourage you to get in touch for an obligation-free consultation.
